

## Q42017 Updates

- System notification need TIMESTAMP in history: Back end change that allows looking up notifications by date.
- Remove Inactive Providers from the facesheet and Phys Qtly Med Review (Format): Cleaning up face sheet.
- Medication Check IO Search Not working : Fix allows you to search on Medication Check IO for intake meds, destroyed meds, release, or returns
- MAR Generation on Discharge Cleanup: Clears out meds that have been DC'd so they don't appear on the MAR
- Service Plan Item Layout merge report needs category added: fixed
- Remove Required from "End Point Path" on the "Custom Tasks" form: bug fix for custom setting on Charting site
- Fixes the Imported medication deletion
- Fix The Unit Settings on Queries: Back end display
