

BlueStep

Product Guide

BlueStep is the most comprehensive web-based technology solution available for assisted-living care providers. We help manage every aspect of your business including resident records, medication administration, care charting, marketing, human resources, facility management and more. BlueStep is committed to reducing liabilities and staff workload, and increasing profitability. Our fully flexible platform empowers you to easily customize solutions to meet your needs. We call it, “Brilliant solutions powered by you.”

ManageMAR

BlueStep’s revolutionary ManageMAR is true integration; connecting communities with physicians, pharmacies, families and other stakeholders of care and concern for the resident through dynamic automation.

ManageCARE

ManageCARE takes BlueStep to the next level by integrating medication administration with care systems for assessments, service plans, ADLs, vital signs, incident reports and more. ManageCARE offers a single login solution for all medication and care charting.

ManagePRO

ManagePRO stands alone in care community information management. This comprehensive platform combines all components of ManageMAR and ManageCARE, and adds marketing, HR/staffing, facility maintenance, state survey, housekeeping, invoices and more. With ManagePRO, every aspect of the system is fully customizable to meet your community’s specific needs.

ManageMAR

A MAR system beyond the traditional paper or electronic MAR

BlueStep's revolutionary ManageMAR™ is true integration; connecting communities with physicians, pharmacies, families and other stakeholders of care and concern for the resident through dynamic automation.

Reduce Staff Workload

BlueStep goes beyond the traditional eMAR. Dynamic automation means simplification of routine and repetitive tasks. Enter a resident's information one time and their information is updated in every section for every user - in real time. If your staff knows how to check email, they can use BlueStep. In a few mouse clicks, staff can chart, add or discontinue medications instantly.

Reduce Liabilities

Maintaining regulatory compliance is simple with BlueStep's Liability Monitor. As staff work within the system, critical alerts and notifications are triggered when certain protocols or standards are not met providing perfect documentation and peace of mind.

Connect with Resident's Circle of Care

BlueStep's ManageMAR integrates with pharmacy software applications via HL7 standards and allows pharmacies remote access to ManageMAR and resident demographics via BlueStep's PharmacyConnect online portal. In addition, families can access their own loved one's information and care details via BlueStep's secure FamilyConnect online portal.

Features:

- Resident Information Management
- Medication Administration Record
- Pharmacy Software Integration
- Critical Alerts & Notifications
- Electronic Medication Re-Ordering
- Printable Forms
- Automated Offline Backups
- Real-time Data Updates
- State Survey Compliant
- Liability Monitor™
- FamilyConnect™
- PharmacyConnect™

ManageCARE

Integrating care systems with medication administration records

Assisted living providers need a comprehensive technology solution that integrates medication administration with care systems. ManageCARE includes assessments, service plans, ADLs, vital signs, incident reports, shift change reports and invoicing. In conjunction with BlueStep's ManageMAR, ManageCARE offers additional features tailored to reduce liabilities and staff workload and increase long-term care providers' profitability.

More Confidence with Less Liability

Peace of mind is needed as you operate in an increasingly litigious industry. We believe that perfect documentation and charting is the only perfect defense. ManageCARE incorporates BlueStep's proprietary Liability Monitor. Dynamic reporting, auditing and alerting allows companies to build custom parameters and monitor data. Staff members receive on-screen email or text message alerts when instances occur, thus keeping your community compliant with corporate and state regulations.

More Care with Less Administration

ManageCARE uses a single login for both medication admin and care charting. In addition to care charting and staff report incidents, make specific notes for each resident that are visible throughout the organization. This reduces redundancy, allowing staff members more time to provide quality care to residents.

More Invoices with Less Error

Whether a point system, flat monthly fee or other initiative, ManageCARE's configurable assessments, service plans and ADLs, automatically create invoices based on client preferences for services. You set up the parameters, your staff charts, and ManageCARE creates the invoice. ManageCARE improves the accuracy of invoices and allows them to be sent as PDF documents to responsible parties.

Features:

- All features of ManageMAR
- Assessments
- Service Plans
- Activities of Daily Living (ADLs)
- Vital Signs
- Incident Reporting
- Shift Change Reporting
- Resident Notes

ManagePRO

A completely customizable technology solution for care providers

BlueStep's ManagePRO stands alone in care community information management. This comprehensive platform combines all components of ManageMAR and ManageCARE, and adds marketing, HR/staffing, facility maintenance, state survey, housekeeping, invoices and more. With ManagePRO, every aspect of the system is fully customizable to meet your community's specific needs.

Maintain an Optimal Census Beyond Marketing

Untimely response or losing leads are a thing of the past with the ManagePRO Marketing module. Leads become the basis of the admission and ultimately the resident record without ever having to enter the information twice. With BlueStep's Critical Alerts & Notifications, your marketing director is notified via text message, on-screen alert, or email the moment a new lead is entered. Custom reports on key information and statistics provide real time tracking of current initiatives.

Manage Staffing Effortlessly

Managing staff time cards, attendance and scheduling, certifications, daily activities, and in-service trainings has never been easier than with the ManagePRO HR/Staffing module.

Keep All Care Providers Connected

BlueStep's proprietary Connect technology securely allows your community to communicate with any party of care and concern for the resident. Create your own Connect sites to coordinate care and facilitate real-time communication with BlueStep's customizable Connect portals, Family Connect, Pharmacy Connect, PhysicianConnect, HospitalConnect, LabConnect and more! BlueStep users are changing the industry, one connection at a time.
